This Journal is published monthly by the American Society of Civil Engineers. Publications office is at 345 East 47th Street, New York, N.Y. 10017. Address all ASCE correspondence to the Editorial and General Offices at 345 East 47th Street, New York, N.Y. 10017. Allow six weeks for change of address to become effective. Subscription price to members is \$8.00. Nonmember subscriptions available; prices obtainable on request. Second-class postage paid at New York, N.Y. and at additional mailing offices. HY, SM.

The Society is not responsible for any statement made or opinion expressed in its publications.

DISCUSSION

Proc. Paper 9524

Behavior of Laterally Loaded Piles: III—Socketed Piles, by Harry G. Poulos (Apr., 1972).
errata 221

Engineering Properties of Compacted Fly Ash,^a by Donald H. Gray and Yen-Kuang Lin (Apr., 1972).
by Dimtcho Evstatiev 221

Duplication of Dilatancy in Analysis of Jointed Rocks, by Richard E. Goodman and Jacques Dubois (Apr., 1972).
errata 224

In Situ Shear Wave Velocity by Cross-Hole Method,^a by Kenneth H. Stokoe, II and Richard D. Woods (May, 1972).
by Wolfgang A. Haupt 244

INFORMATION RETRIEVAL

The key words, abstract, and reference "cards" for each article in this Journal represent part of the ASCE participation in the EJC information retrieval plan. The retrieval data are placed herein so that each can be cut out, placed on a 3 × 5 card and given an accession number for the user's file. The accession number is then entered on key word cards so that the user can subsequently match key words to choose the articles he wishes. Details of this program were given in an August, 1962 article in CIVIL ENGINEERING, reprints of which are available on request to ASCE headquarters.

^aDiscussion period closed for this paper. Any other discussion received during this discussion period will be published in subsequent Journals.
