

PERMISSION TO PHOTOCOPY JOURNAL PAPERS

Permission to photocopy for personal or internal reference beyond the limits in Sections 107 and 108 of the U.S. Copyright Law is granted by the American Society of Civil Engineers for libraries and other users registered with the Copyright Clearance Center, 21 Congress Street, Salem, Mass. 01970, provided the appropriate fee is paid to the CCC for all articles bearing the CCC code. Requests for special permission or bulk copying should be addressed to the Manager of Technical and Professional Publications, American Society of Civil Engineers.

CONTENTS

Self-Formed Straight Channels in Sandy Beds <i>by Syunsuke Ikeda</i>	389
Variation of Karman Constant in Sediment-Laden Flow <i>by Shang-yi Wang</i>	407
Performance of Baffled Chute with 90° Bend <i>by David T. Higgins</i>	419
Unstable Turbulent Flow in Open Channels <i>by Jean E. Berlamont and Nicole Vanderstappen</i>	427
Separated Flow Through Large Sudden Expansions <i>by Prabhulal R. Mehta</i>	451
Simulating Mass Transport in Unconfined Aquifers <i>by Varuttamadhira Guvanasen and Raymond E. Volker</i>	461
Mathematical Model of Shallow Water Flow over Porous Media <i>by Ali Osman Akan and Ben Chie Yen</i>	479

This Journal is published monthly by the American Society of Civil Engineers. Publications office is at 345 East 47th Street, New York, N.Y. 10017. Address all ASCE correspondence to the Editorial and General Offices at 345 East 47th Street, New York, N.Y. 10017. Allow six weeks for change of address to become effective. Subscription price to members is \$16.50. Nonmember subscriptions available; prices obtainable on request. Second-class postage paid at New York, N.Y. and at additional mailing offices. HY.

The Society is not responsible for any statement made or opinion expressed in its publications.

TECHNICAL NOTES

Proc. Paper 16154

Scales for Circular Jets in Cross-Flow

by Nallamuthu Rajaratnam and Thimmaiah Gangadharaiiah 497

Sand-Water Slurry Experiment

by M. R. Carstens and Graeme Addie 501

New Design Equations for Scour Around Bridge Piers

by Christopher James Baker 507

DISCUSSION

Proc. Paper 16151

Estimation of Direct Runoff from Urban Watersheds, by Aolad Hossain, A. Ramachandra Rao, and Jacques W. Delleur (Feb., 1978. Prior Discussion: Aug., 1980).

errata 515

Estimating Average Velocity in Gravel-Bed Rivers, by Dale I. Bray (Sept., 1979. Prior Discussions: Sept., Oct., 1980).

closure 515

Hydraulic Geometry of Active Gravel Rivers, by Gary Parker (Sept., 1979. Prior Discussions: July, Oct., 1980).

closure 517

Approximate Flood Routing Methods: A Review, by P. Erwin Weimann and Eric M. Laurenson (Dec., 1979. Prior Discussions: Nov., Dec., 1980).

errata 519

Log Pearson Type 3 Distribution: A Generalized Evaluation,^a by Donthamsetti Veerabhadra Rao (May, 1980).

by M. Riazul Hasan 519

^aDiscussion period closed for this paper. Any other discussion received during this discussion period will be published in subsequent Journals.

Heat Loss from Sidearms of Cooling Lakes,^a by Terry W. Sturm and John F. Kennedy (May, 1980). <i>by Subhash C. Jain and Nevzat Yildirim</i>	521
Characteristics of Low Flows,^a by the Task Committee on Low-Flow Evaluation and Needs of the Committee on Surface-Water Hydrology of the Hydraulics Division (May, 1980). <i>by Michel North</i>	523
Composite Roughness of Natural Channels,^a by Asok K. Motayed and Muthusamy Krishnamurthy (June, 1980). <i>by James Grant Mac Broom</i>	526
Boundary Layers in Developing Open Channel Flow,^a by Edward Silberman (July, 1980). <i>by Edward H. Wilson</i>	527
Scour Velocities in Ephemeral Channels,^a by William C. Hughes (Sept., 1980). <i>by Subhash C. Mehrotra</i>	529
Submerged Horizontal Jet over Erodible Bed,^a by S. S. Chatterjee and S. N. Ghosh (Nov., 1980). <i>by Subhash C. Mehrotra</i>	530

INFORMATION RETRIEVAL

The key words, abstract, and reference "cards" for each article in this Journal represent part of the ASCE participation in the EJC information retrieval plan. The retrieval data are placed herein so that each can be cut out, placed on a 3 × 5 card and given an accession number for the user's file. The accession number is then entered on key word cards so that the user can subsequently match key words to choose the articles he wishes. Details of this program were given in an August, 1962 article in CIVIL ENGINEERING, reprints of which are available on request to ASCE headquarters.

^aDiscussion period closed for this paper. Any other discussion received during this discussion period will be published in subsequent Journals.
