Papers

	Number
Digital Computation for Stiffness Matrix Analysis by J. S. Archer	1814
Numerical Solution for Interconnected Bridge Girders by Henry Malter	1815
Generalization of the Successive Approximations Method by Panagiotis D. Moliotis	1816
Golden Gate Bridge Vibration Studies by George S. Vincent	1817
Concrete Beams and Columns with Bundled Reinforcement by N. W. Hanson and Hans Reiffenstuhel	1818
Matric Formulation of Slope-Deflection Equations by Chu-Kia Wang	1819
Equivalent Systems for the Deflection of Variable Stiffness Members by D. G. Fertis and E. C. Zobel	1820
Amplification of Stress and Displacement in Guyed Towers by Robert S. Rowe	1821
Discussion	1827
