

CONTENTS

Methane Migration around Sanitary Landfills <i>by Charles A. Moore, Iqbal S. Rai, and Ayad A. Alzaydi</i>	131
Probabilistic Evaluation of Liquefaction Potential <i>by Achintya Haldar and Wilson H. Tang</i>	145
Reliability Analysis of Slopes: Frequency-Domain Method <i>by Daniele Veneziano and Jaime Antoniano</i>	165
Cap Model Guided by Energy Concept <i>by Shoji E. Yamada and Ahmed S. Abou-Sayed</i>	183
Soil Liquefaction and Cyclic Mobility Evaluation for Level Ground during Earthquakes <i>by H. Bolton Seed</i>	201
Resilient Response of Two Frozen and Thawed Soils <i>by Edwin J. Chamberlain, David M. Cole, and Thaddeus C. Johnson</i>	257
Vertical Vibration of Piles <i>by Roger L. Kuhlemeyer</i>	273
Static and Dynamic Laterally Loaded Floating Piles <i>by Roger L. Kuhlemeyer</i>	289
Railroad Ballast Prescription: State-of-the-Art <i>by Gerald P. Raymond</i>	305

This Journal is published monthly by the American Society of Civil Engineers. Publications office is at 345 East 47th Street, New York, N.Y. 10017. Address all ASCE correspondence to the Editorial and General Offices at 345 East 47th Street, New York, N.Y. 10017. Allow six weeks for change of address to become effective. Subscription price to members is \$12.00. Nonmember subscriptions available; prices obtainable on request. Second-class postage paid at New York, N.Y. and at additional mailing offices. GT, HY.

The Society is not responsible for any statement made or opinion expressed in its publications.

TECHNICAL NOTES

Proc. Paper 14349

Bending Element for Circular Beams and Piles
by Roger L. Kuhlemeyer 325

DISCUSSION

Proc. Paper 14354

SPT and Relative Density in Coarse Sands,^a by William F. Marcuson III and Wayne A. Bieganousky (Nov., 1977. Prior Discussion: Sept., 1978). and **Drill Rod Influence on Standard Penetration Test,**^a by Ralph E. Brown (Nov., 1977).
by Victor F. B. de Mello 333

INFORMATION RETRIEVAL

The key words, abstract, and reference "cards" for each article in this Journal represent part of the ASCE participation in the EJC information retrieval plan. The retrieval data are placed herein so that each can be cut out, placed on a 3 × 5 card and given an accession number for the user's file. The accession number is then entered on key word cards so that the user can subsequently match key words to choose the articles he wishes. Details of this program were given in an August, 1962 article in CIVIL ENGINEERING, reprints of which are available on request to ASCE headquarters.

^aDiscussion period closed for this paper. Any other discussion received during this discussion period will be published in subsequent Journals.
