TECHNICAL NOTES

Proc. Paper 12167

Optimum Use of Pretensioning, Post-Tensioning, and Two-Way Prestressing <i>by Narindar Bhandari</i>	403
---	-----

DISCUSSION

Proc. Paper 12160

Recommended Standards for the Responsibility, Authority, and Behavior of the Inspector,^a by the Committee on Inspection of the Construction Division (June, 1975). <i>by Lewis H. Tuthill</i>	411
<i>by Harold K. Friedland</i>	412

Some Applications of Prestressing in Foundation Construction,^a by Ingvar Schousboe (June, 1975). <i>by Géorge Tamaro</i>	413
---	-----

INFORMATION RETRIEVAL

The key words, abstract, and reference "cards" for each article in this Journal represent part of the ASCE participation in the EJC information retrieval plan. The retrieval data are placed herein so that each can be cut out, placed on a 3 × 5 card and given an accession number for the user's file. The accession number is then entered on key word cards so that the user can subsequently match key words to choose the articles he wishes. Details of this program were given in an August, 1962 article in CIVIL ENGINEERING, reprints of which are available on request to ASCE headquarters.

^aDiscussion period closed for this paper. Any other discussion received during this discussion period will be published in subsequent Journals.
