

PERMISSION TO PHOTOCOPY JOURNAL PAPERS

Permission to photocopy for personal or internal reference beyond the limits in Sections 107 and 108 of the U.S. Copyright Law is granted by the American Society of Civil Engineers for libraries and other users registered with the Copyright Clearance Center, 21 Congress Street, Salem, Mass. 01970, provided the appropriate fee is paid to the CCC for all articles bearing the CCC code. Requests for special permission or bulk copying should be addressed to the Manager of Technical and Professional Publications, American Society of Civil Engineers.

CONTENTS

Window Glass Design Practices: A Review
by Joseph E. Minor 1

Inelastic Material Models in Earthquake Response
by Clifford O. Hays, Jr. 13

Load and Hydrostatic Testing of Waterstops
by Robert L. Hails, Marius Vogelfanger, and Michael L. Conner 29

Membrane Reinforcement in Shells
by Ajaya K. Gupta 41

Wind-Induced Lock-In Excitation of Tall Structures
by Kenny C. S. Kwok and William H. Melbourne 57

Reliability of Wood Structural Elements
by Bruce Ellingwood 73

Statistical Study of Experiments on Welded Beams
by Yuhshi Fukumoto and Yoshito Itoh 89

This Journal is published monthly by the American Society of Civil Engineers. Publications office is at 345 East 47th Street, New York, N.Y. 10017. Address all ASCE correspondence to the Editorial and General Offices at 345 East 47th Street, New York, N.Y. 10017. Allow six weeks for change of address to become effective. Subscription price to members is \$22.50. Nonmember subscriptions available; prices obtainable on request. Second-class postage paid at New York, N.Y. and at additional mailing offices. ST.

The Society is not responsible for any statement made or opinion expressed in its publications.

Ontario Equivalent Base Length: An Appraisal <i>by Colin O'Connor</i>	105
Snap-Through Buckling of Reticulated Space Trusses <i>by Heinrich Rothert, Timm Dickel, and Detlef Renner</i>	129
Inelastic Behavior of Concrete Frame-Wall Structures <i>by Katsuhiko Emori and W. C. Schnobrich</i>	145
Interaction Buckling in I-Section Columns <i>by Gregory J. Hancock</i>	165
Ductility of Spirally-Confined Concrete Columns <i>by M. J. N. Priestley, R. Park, and R. T. Potangaroa</i>	181
Reliability of Steel Buildings under Winds <i>by Kamal Rojiani and Yi-Kwei Wen</i>	203
Combination of Various Load Processes <i>by Richard D. Larrabee and C. Allin Cornell</i>	223

DISCUSSION

Proc. Paper 15955

Assemblage Method for Folded-Plate Analysis , by Fouad H. Victor and Fernand Ellyin (July, 1979). <i>errata</i>	243
Dynamic Characteristics of Coupled Shear Walls , by Amiya K. Basu, Ashok K. Nagpal, Ravinder S. Bajaj, and Ashok K. Guliani (Aug., 1979. Prior Discussions: July, 1980). <i>closure</i>	243
Equivalent Frame Analysis for Lateral Loads , by M. Daniel Vanderbilt (Oct., 1979. Prior Discussion: July, 1980). <i>closure</i>	245
Standard Prestressed Concrete Beam Design,* by David S. Hatcher (Jan., 1980). <i>by Andrzej J. Tomaszewicz</i>	246

*Discussion period closed for this paper. Any other discussion received during this discussion period will be published in subsequent Journals.

Torsional Buckling Study of Hartford Coliseum,* by Robert S. Loomis, Raymond H. Loomis, Robert M. Loomis, and Richard W. Loomis (Jan., 1980. Prior Discussions: Oct., 1980). <i>by C. Andrew Pretzer</i>	248
Cost Optimization of Buildings,* by Alan D. Russell and Khalid T. Choudhary (Jan., 1980). <i>by C. N. Srinivasan</i>	249
Stochastic Simulation of Wood Load-Sharing Systems, by A. Louis DeBonis (Feb., 1980). <i>errata</i>	252
Factors Influencing Frame Stability,* by Charles Birnstiel and Jerome S. B. Iffland (Feb., 1980). <i>by M. Nuray Aydinoglu</i>	252
Wilhelm Ritter: Teacher of Maillart and Ammann,* by David P. Billington (May, 1980). <i>by Ignacio Martín</i>	254
Seismic Shear Stresses in Buried Beams,* by T. Selcuk Atalik (June, 1980). <i>by Michael J. O'Rourke</i>	255

INFORMATION RETRIEVAL

The key words, abstract, and reference "cards" for each article in this Journal represent part of the ASCE participation in the EJC information retrieval plan. The retrieval data are placed herein so that each can be cut out, placed on a 3 × 5 card and given an accession number for the user's file. The accession number is then entered on key word cards so that the user can subsequently match key words to choose the articles he wishes. Details of this program were given in an August, 1962 article in CIVIL ENGINEERING, reprints of which are available on request to ASCE headquarters.

*Discussion period closed for this paper. Any other discussion received during this discussion period will be published in subsequent Journals.
