

CONTENTS

Sand Motion Initiation by Waves: Two Asymptotes <i>by Robert J. Hallermeier</i>	299
Wind Setup Effects in Large Open Channels <i>by Johannes J. DeVries and Jaime Amoroch</i>	319
Water Level Variations along California Coast <i>by Raymond A. Smith and Robert J. Leffler</i>	335
Laboratory Generated Waves and Wave Theories <i>by Subrata K. Chakrabarti</i>	349
Knickpoint Migration due to Baselevel Lowering <i>by Ze'ev B. Begin, David F. Meyer, and Stanley A. Schumm</i>	369
Impact of Gravel Mining on River System Stability <i>by Peter F. Lagasse, Brien R. Winkley, and Daryl B. Simons</i>	389

TECHNICAL NOTES

Proc. Paper 15592

Golden Gate Tidal Measurements: 1854-1978 <i>by Raymond A. Smith</i>	407
Wave Propulsion of Spar Buoys <i>by Thomas A. McClimans</i>	410

DISCUSSION

Proc. Paper 15587

Sand Bed Friction Factors for Oscillatory Flows,^a by Philip Vitale (Aug., 1979).	
<i>by Ivar G. Jonsson</i>	423
<i>by Karl Lofquist</i>	425
Moving Boundary Numerical Surge Model,^a by Gour-Tsyh Yeh and Fang-Kuo Chou (Aug., 1979).	
<i>by Daniel R. Lynch</i>	425

INFORMATION RETRIEVAL

The key words, abstract, and reference "cards" for each article in this Journal represent part of the ASCE participation in the EJC information retrieval plan. The retrieval data are placed herein so that each can be cut out, placed on a 3 × 5 card and given an accession number for the user's file. The accession number is then entered on key word cards so that the user can subsequently match key words to choose the articles he wishes. Details of this program were given in an August, 1962 article in CIVIL ENGINEERING, reprints of which are available on request to ASCE headquarters.

^aDiscussion period closed for this paper. Any other discussion received during this discussion period will be published in subsequent Journals.
