

Index

- breeze penetration 8–9, 14*f*, 17
- computational fluid dynamics 23–24, 37*f*, 40–42
- dispersion modeling: in boundary layer
wind tunnels 22; with computational
fluid dynamics 23–24, 37*f*
- field studies 42–43
- flow visualization 38, 43*f*, 44*f*
- heat islands 8–9, 14*f*
- high-rise office buildings 18–19, 23*t*, 32*f*,
33*f*
- hurricane shelters. *see* storm shelters
- natural ventilation: of high-rise office
buildings 18–19, 23*t*, 32*f*, 33*f*; of low-
rise buildings 19–20, 34*f*, 35*f*; outdoor
human comfort 20–21, 36*f*; for urban
development 9
- pedestrian level winds 6–8, 13*f*, 16–17,
28*f*, 29*f*, 30*f*
- storm shelters 15–16, 25*f*, 26*f*, 27*f*, 28*f*
- tornado shelters. *see* storm shelters
- town planning 6, 12*f*
- urban aerodynamics: elements of 2; tools
and techniques 3; wind engineering in
2–3
- urban planning 5, 6–9, 10*f*, 11*f*, 12*f*, 13*f*,
14*f*
- urbanization trends 4*t*
- wind effects 38, 45*f*
- wind power 23
- wind shielding 17–18, 30*f*, 31*f*
- wind tunnels: dispersion modeling in 22;
measurements in 39–40, 47*f*
- winds: breeze penetration 8–9, 14*f*; heat
islands 8–9, 14*f*; natural ventilation 9,
14*f*; pedestrian level 6–8, 13*f*, 16–17,
28*f*, 29*f*, 30*f*; wind shielding 17–18, 30*f*,
31*f*
